

NEW VISIONMOUNT™ MOTORIZED TILTING MOUNT

Change the channel... and the position of your flat-panel TV

Our new Sanus® VisionMount motorized tilting mount offers fully automated movement by remote control, so it's easy to find and keep the perfect viewing angles, even in hard-to-reach places. The LMT15 automatically tilts to a pre-set position when the TV is turned on, or you can use your remote control to position it as desired. Its sturdy, ultra-light wall plate is constructed of extruded aluminum for effortless installation, and features an open design for easy cable management. ClickFit™ technology allows power conditioners and other small devices to snap onto the mount, so they're hidden yet easily accessible. With the VisionMount LMT15, you've always got the best seat in the house.

model LMT15-B1 shown

When used with the optical output on the TV, safety sensors stop movement instantly if object interference is detected

Automatically tilts to preset viewing angle when TV is turned on, or use remote control to position as desired

Extruded aluminum construction is strong and lightweight, making installation a breeze

Open wall plate allows flexibility for cables and wiring

ClickFit™ technology allows power conditioners and other small devices to snap onto the mount, so they're hidden yet easily accessible
