

NEW VISIONMOUNT EXTRA-LARGE AND LARGE FULL-MOTION MOUNTS

New full-motion mounts make installation a dream

The HDpro™ Series XF228 and LF228 mounts were engineered with the custom installer in mind. They feature pre-assembled interfaces and strong, ultra-light extruded aluminum wall plates for the easiest and quickest installation possible. The QuickConnect™ system allows the mounting head to snap onto the arm assembly with one easy movement and unlock with the push of a button. ProSet™ post-installation height and leveling adjustments ensure TVs are always perfectly positioned after mounting. But here's the major innovation: these sturdy mounts feature FollowThru™ in-arm cable channels, which protect and completely conceal all cables without inhibiting movement, even through the joint.

model LF228-B1 shown

FollowThru™ in-arm cable management channel protects and completely conceals all cables without inhibiting movement, even through the joint

Virtual Axis™ tilting technology allows effortless viewing angle adjustment without the use of tools

Lightweight extruded aluminum wall plate features an open design to make installation and cable management a breeze

XF228-B1

Arm assembly shifts left and right on wall plate so TV is always centered, even if wall studs are not

ProSet™ post-installation height and level adjustments ensure TV is perfectly positioned after mounting
